

CodeHS

AP CS in Java Course Features

OVERVIEW

The CodeHS AP Java course is a year-long course designed to help students master the basics of Java and equip them to successfully pass the AP Computer Science A Exam at the end of the school year. The curriculum has been pre-approved by College Board's AP Course Audit as meeting or exceeding the curricular expectations colleges and universities have for this subject.

TEACHER TOOLS

Monitor class and individual student progress, easily and efficiently grade student work, design a customizable and dynamic class syllabus and more. Teachers find tools to save them time and focus one-on-one with their students.

TEACHER RESOURCES

Access daily lesson plans, offline handouts and activities, sample solutions and more. Teachers have access to all of the resources they need to teach their class, all in one place.

AP TEST PREP

Prepare for the AP exam with our large repository of autograded practice quizzes on all main concepts, as well as full practice AP Exams.

AUTOGRADING

Autograding provides immediate feedback on the functionality and style of a program. Students receive helpful feedback to help them debug their programs, without needing immediate support from their teacher.

CREATE AND CUSTOMIZE CURRICULUM

With CodeHS Create, teachers can customize their own curriculum and create exercises, projects, assessments, autograders and more.
