

HOW CODEHS PREPARES YOU FOR COLLEGE

COLLEGE-LEVEL CODING

CodeHS courses range from introductory level programming all the way to AP level programming in many languages. **By taking our Intro to JavaScript course, you're already a semester through Intro to Computer Science in college!**

DIGITAL PROJECT PORTFOLIO

With CodeHS, you will create awesome coding projects, such as mobile apps and websites! All of these projects can be added to your portfolio and shared on college applications which will help set you apart from other college applicants.

PROBLEM SOLVING & CRITICAL THINKING SKILLS

Whether you want to be an engineer or not, coding helps you develop essential transferable skills (just like reading and writing) that all colleges look for including problem-solving, critical thinking, and computational thinking.

By taking the AP CSP or Java exam, you have the opportunity to earn up to a full year of college credits in computer science! **Enroll in a CodeHS course at your school today.**
