CodeHS

Code Missouri

What is Code Missouri?

Code Missouri is an initiative to expand high-quality computer science programs across Missouri with a focus on rural school districts. Learn more at CodeMissouri.com!

Our Commitment

CodeHS commits to helping close the computer science opportunity gap between urban and rural districts in Missouri. Coding is the new foundational skill and all students deserve the opportunity to take computer science courses at their local schools.

As part of our commitment, CodeHS will be offering CodeHS Pro and professional development to 15 rural school districts in Missouri for free.

> *"Learning to code unlocks and connects the rural student to career opportunities that are seemingly 'invisible and unknown' in rural areas of the state. Even for the student not interested in pursuing a career in computer science, learning computational thinking provides the student the tools to understand, evaluate, and solve complex problems."*
>
> *- Roberta Carson, School Counselor*

What is CodeHS?

CodeHS is a comprehensive teaching platform for helping schools teach computer science by providing web-based curriculum, teacher tools and resources, and professional development. With CodeHS professional development and teacher support, any interested teacher will be able to confidently offer this curriculum to their students -- no prior programming experienced required.
