

CodeHS

Dear [Principal],

I'm writing to tell you about CodeHS, a new online computer science curriculum that I am excited about using in my class this year.

CodeHS provides everything that I need to teach a fun and engaging class that will introduce my students to programming:

- **Step-by-step curriculum:** CodeHS provides short videos, example code, and exercises that students can complete at their own pace.
- **Focus on problem solving:** CodeHS teaches the building blocks of programming by focusing on problem solving, not syntax. These skills can be applied to any coding language that the students want to learn in the future.
- **Simple to run:** We can do all of the coding in the web browser without downloading any software.
- **Great teacher tools:** I'll be able to keep track of the individual student and class progress, grade student submissions, and get support from the CodeHS team while teaching.

If you are interested in reading more, I've included a PDF handout highlighting the importance of learning computer science and the benefits of using CodeHS. I'm also happy to connect you with someone from the CodeHS team if you have other questions.

I would love to move forward with CodeHS in my classroom, so I have spoken to the CodeHS team about membership options for the year. To gain Basic Access to CodeHS (which includes the aforementioned features) for my ___ students, it will cost ___ .

It would be great to schedule 15-20 minutes to talk with you about using CodeHS this year.

Thank you,
[Teacher Name]
